PROFESSIONAL SUMMARY

Senior Mobile Engineer with 10+ years of experience building scalable Android, iOS, and Flutter applications across fintech, healthcare, social, and enterprise domains. Experienced in mobile architecture, CI/CD implementation, production release management, and real-time systems. Currently expanding expertise in AI-powered mobile applications, intelligent user experiences, AI integration, and AI-assisted development workflows.

AI EXPERIENCE & DEVELOPMENT

- Learning and implementing AI-powered features for mobile applications.
- Exploring integration with LLM APIs and AI services for smarter user experiences.
- Using AI-assisted development tools to improve engineering productivity, debugging, and code quality.
- Interested in AI-driven mobile applications including recommendation systems, chat assistants, and automation.
- Actively upskilling in AI for mobile engineering with Flutter and backend AI integrations.

EXPERIENCE

Velvett, Singapore — Senior Software Engineer

July 2025 - April 2026

- Built and maintained a **production-ready digital gacha platform** supporting coin purchases, gacha pulls, item lifecycle, and physical shipping
- Shipped **multiple live mobile app releases** with real users and App Store compliance
- Reduced crash rate using **Crashlytics-driven fixes**
- Delivered **complex business flows** (appraisal → offer → wallet → withdrawal)
- Maintained high development velocity with clean architecture & reusable components
- Proven experience handling **Japan-market production apps**

Amartha Microfinance, Indonesia — Senior Mobile Developer

July 2023 - 2025

- Migrating Amartha Plus Mobile Native to Flutter
- Working closely with back-end developers to integrate with API or other supporting systems
- Publishing application on the App Store and Google Play Store

Tech Stacks: Android Kotlin, Flutter, Firebase

SKILLS

- Flutter, Android (Kotlin/Java), iOS (Swift)
- Clean Architecture, Bloc, MVVM, VIPER
- Firebase, GraphQL, REST API, gRPC, WebSocket
- AWS Amplify, Cognito, S3, DynamoDB
- CI/CD: Codemagic, GitHub Actions
- Crashlytics, Sentry, Performance Optimization
- AI Integration, AI-Assisted Development, Prompt Engineering
- Python, PHP, PostgreSQL, JavaScript

AWARDS

Indosat Hackathon TOP 12 Finalist, Jakarta - 2019

DILO Hackathon 1st Winner, Yogyakarta - 2018

High School Computer Olympiad 3rd Winner, Yogyakarta - 2006

LANGUAGES

English, Indonesian, Javanese

Monit Pay, Indonesia — Senior Mobile Developer

March 2022 - July 2023

- Working closely with the Co-Founder to understand business requirements and help translate these into technical requirements for the development team
- Building the application from scratch
- Provide guidance and recommendations for architectural review of the mobile project implementation
- Directing the mobile development team in the design, development, coding, testing, and debugging of applications
- Working closely with back-end developers to integrate with API or other supporting systems
- Publishing application on App Store and Google Play Store

Tech Stacks : Flutter, GraphQL, Firebase, Codemagic, GitHub Action, Sentry, Python, PostgreSQL

Klar Smile, Indonesia — Senior Mobile Developer

December 2021 - March 2022

- Maintain mobile application, bug fixing, performance issues
- Collaborate with the teams of UI/UX designer, PM, QA, and other developers
- Implement best practices of mobile architecture
- Understanding of CI/CD pipeline tool codemagic

Tech Stacks : Flutter, Android Native, iOS Native, RESTful API, Firebase, Sentry, Codemagic, Laravel, PostgreSQL

TimeGap, Singapore — Senior Mobile Developer

July 2020 - March 2022

- Working closely with the CEO and CTO to understand business requirements and help translate these into technical requirements for the development team
- Building the application from scratch
- Provide guidance and recommendations for architectural review of the project implementation
- Collaborate closely with the teams of UI/UX designer, QA, and other developers

Tech Stacks : Flutter, Android, iOS Native, GraphQL, AWS Cognito, Amplify, S3, Lamda, Rekognition, Agora video call, Stripe, Xendit payment gateway, Firebase, DynamoDB

HelloApp Messenger, Yogyakarta — Senior Mobile Developer

March 2017 - February 2020

Tech stack : Android Kotlin, Flutter, gRPC, Firebase

Gama Techno, Yogyakarta — Mobile Developer

February 2015 - February 2017

On Site Software House Company
Developed app Hangout Deals (Android Java)
Develop app Lacakin (Android Java)
Develop app Cared Safety (Android Java)
Develop app DesaApp (Android Java)
Develop app Wahana Pet Indonesia (Android Java)
Develop app BPD DIY KU (Android Java)
Develop app Evenia (Android Java)
Develop app Siaga UGM (Android Java)

CitraWeb Nusamedia, Yogyakarta — Mobile Developer

2014 - 2015

On Site Software House Company
Developed app Indostreamers (Android Java)
Developed app Jogjastreamers (Android Java)

Developed app Gudegnet (Android Java)

Gracia Visi Pratama, Semarang — *IT Support*

2012 - 2013

Installation of a laboratory system in a national scale hospital
On Site and Remote Network and Troubleshooting
Create a local network for the laboratory system using a windows server
Installation for data communication with laboratory equipment

PROJECT

PLN DAILY — *Mobile Developer*

Language used: Flutter

Bhayangkara Hospital App,Banjarmasin — *Mobile Developer*

Language used : Android Kotlin

Paragon Mall App, Solo — *Mobile Developer*

Language used: Android Kotlin

Ekasakti University (UNES) App,Padang — *Mobile Developer*

Language used: Flutter

GeNose — *Mobile Developer*

Language used: Flutter

EDUCATION

University of AMIKOM, Yogyakarta — *Bachelor Degree on Computer Science*

July 2007 - April 2012

- Fundamental Computer Science
- Network and Database
- Programming Languages (Pascal, C, Java, PHP)
